Description:

For the month of December, Bau-Xi Photo presents new work by U.S. photographer Jeffrey Milstein from his most recent series, *LA NY*. Vibrant in their treatment of colour and composition, Milstein's images afford spectacular views of the beautiful geometry of Los Angeles and New York from 1000-2000 feet overhead. Focused on form and symmetry, they lend a fresh perspective to the cities' best known landmarks and suburban areas. Milstein's background as a professional photographer, graphic designer, and architect greatly inform his interpretation of the urban landscape.

Milstein's photographs have been published in *Esquire*, *EnRoute Magazine*, *DieZeit Magazine* and the *Smithsonian Air and Space Magazine*. His work resides in numerous public collections including the *Smithsonian Museum*, the *Portland Art Museum*, the *George Eastman House* and the *Ulrich Museum of Art*.
